

ELEPHANT

LIFTING PRODUCTS™

“GENERATION UPON GENERATION OF QUALITY”

FAMILY OWNED & OPERATED

ELEPHANT

LIFTING PRODUCTS™

Elephant Lifting Products introduces the world's highest quality manufactured manual chain hoists, lever hoists, and electric chain hoists that are required in today's industry. Elephant Chain Block Co. Ltd. is family owned and operated, manufacturing lifting equipment in Japan since 1936. The Elephant hoists are known globally for their superior design, advanced safety features, and constant reliability. The manual chain hoists, lever hoists, and electric chain hoists are furnished with our proprietary load chain. The load chain is manufactured within our factory in Osaka, Japan and adheres to the strict DIN 5684 standards. This special grade 105 heat treated high tensile strength load chain (105 kgf / mm²) exceeds ISO V grade chain.

To complement our product line we are introducing two additional lines of lifting equipment: ATS Pneumatic chain hoists and Grippa lifting equipment. ATS and Grippa are both family owned & operated. They are also manufactured within ISO facilities in South Africa. The ATS Pneumatic hoists range from 1/4t industrial type units to specialized 240t BOP handling systems. We can offer specially engineered air chain hoists for applications that demand so, as well as ultra low profile designs. The Grippa beam trolleys are a solid carbon steel design, offering longevity in industrial environments. The Grippa beam clamps are robust in design, engineered to accommodate large girder sizes. Both the Grippa trolleys and beam clamps can be offered with 100% stainless steel side plates, stainless steel components, and solid bronze or solid stainless wheels. These special features are offered for corrosive and spark resistant environments. Elephant Lifting Products also offers a variety of lifting clamps to accommodate various rigging applications.

Elephant Lifting Products, LLC is proud to be family owned and operated. Our product line is promoted and serviced by honorable distributors that are dedicated to the shipyard, petrochemical, power, pulp / paper, construction, mining, offshore, and automotive industries. Elephant products will give our customers the assurance of satisfaction, through performance, during and after each job. We serve you from our home in Gonzales, Louisiana.

HAND CHAIN HOISTS

Super 100 Manual Chain Hoist - With Overload Protection	4-5
C-21 Manual Chain Hoist	6-7
Super 100 Large Capacity Chain Hoist	8-9
SHG & SHGA Low Profile Manual Trolley Hoist	10-11
EX H100 Series - Spark Resistant Manual Hoists & Trolleys	12
Corrosion Resistant Hoist, Trolleys, & Beam Clamps	13
Hoistman - Mini Chain Hoist	14-15
Power Hoistman - Cordless Drill Driven & Hand Crank Hoist	16-17

SUPER 100 MANUAL CHAIN HOIST WITH OVERLOAD PROTECTION

- Overload protection safety device
- Grade 105 galvanized load chain, which adheres to the strict German DIN 5684 standard
- Galvanized hand chain
- Double pawls supporting fail-safe brake mechanism
- Load sheave with roller bearing
- The tough reinforced gear case has four ribs and four knock pins, providing accurate gear centering and high mechanical efficiency
- Rolled edge hand wheel cover
- Heavy duty electrostatic powder coating
- Long life friction discs
- Suitable for operation within a $-4^{\circ} \sim 140^{\circ} \text{F}$ temperature range

C-21 MANUAL CHAIN HOIST

- Grade 105 galvanized load chain, which adheres to the strict German DIN 5684 standard
- Zinc plated hand chain
- Heavy duty frame
- Lightweight lifting capacity ratio, a 1 ton unit with 10' lift weighs 20% less than other Japanese hoists
- Long lasting friction discs
- Extremely wear resistant
- Load chain, hooks, and braking parts have a safety factor of 4+ times. 0.5t ~ 1t units have a safety factor of 5+ times.
- Durable powder coat finish

5 ton model has triple falls

H100 SPARK RESISTANT SERIES

- 0.5t through 20t Capacity
- Hand chain hoists, push & geared trolleys
- II 2 GD c II B T105 °C
- Adheres to the Council Directive and Standards in the EU for explosion proof manual chain hoists.
94/9/EC : ATEX EN1127-1 :2008,
EN13463-1 : 2009, EN13463-5 : 2003
- EX Super 100 hoist dimensions are physically identical to the Super 100 series, see page 5
- Push & geared trolley dimensions are identical to the P and G series of trolleys, see page 21
- Lug mounted units are identical to integral trolley hoists on page 19

Note:

It is the user's responsibility to properly identify which spark resistant classification is required for their application, not the hoist manufacturer or distributor.

CORROSION RESISTANT HOISTS, TROLLEYS & BEAM CLAMPS

- Hoists are 100% nickel plated with stainless steel fasteners
- Hoists are lubricated with FDA approved food-grade grease within the internal gearing
- Hoists have 316 stainless steel hand chain
- Hoist dimensions & performance specifications are identical to the KIIOP and Super 100 series, see pages 5 and 9
- Grippa corrosion resistant trolleys are constructed with 100% stainless steel components
- 100% stainless steel beam clamps are also available

HOISTMAN MINI CHAIN HOIST

150kg & 250kg

HM25 with 10' Lift Weighs 6 lbs.

Safe and Rugged

Load Chain Weighs 0.2 lbs. per foot

Powder Coated Paint with Rust-Resistant Galvanized Load Chain and Stainless Steel Hand chain

Light and compact
Good for working in high places

Above schematic measured in inches

Weight (lbs)	7	6

POWER HOISTMAN CORDLESS DRILL DRIVEN & HAND CRANK HOIST

The Power Hoistman is beneficial for areas that lack electrification, useful within narrow spaces, and low headroom applications. The hoist can be operated by:

- Connecting a power drill directly to the drive mechanism
- Connecting a power drill to the flexible drive shaft
- Using the hand crank directly to the drive mechanism
- Connecting the hand crank handle to the flexible drive shaft
- Standard product is attached with powershaft 5ft, a bit and a handle
- Lifting speed meets the specifications (see pg 19) when r.p.m. of cordless driver drill is 1,300
- Please apply 15.6V cordless driver drill to EHMF-38.
- Do not use electric or pneumatic impact driver.

ELEPHANT INTEGRAL LUG MOUNT TROLLEY HOISTS, PUSH & GEARED

- Overload protection safety device
- Grade 105 galvanized load chain, which adheres to the strict German DIN 5684 standard
- Galvanized hand chain
- Double pawls supporting fail-safe brake mechanism
- Load sheave with roller bearing
- The tough reinforced gear case has four ribs and four knock pins, providing accurate gear centering and high mechanical efficiency
- Rolled edge hand wheel cover
- Heavy duty electrostatic powder coating
- Long life friction discs
- Suitable for operation within a $-4^{\circ} \sim 140^{\circ} \text{F}$ temperature range
- Adjustable to fit various beam widths
- A solid carbon steel design
- The wheels of the trolley fit both I-Beams and H-Beams
- Trolley wheels are parkerized for corrosion resistance
- High quality closed bearings provide smooth traversing
- With Anti-Drop plates

Above schematics are reference only, they are not accurate portrayals for all capacities.
Reference pages 5 and 21 for complete hoist & trolley information.

- 1) Dimension B and C are applicable when beam width is max.
- 2) Dimension H is applicable when beam thickness is max.
- 3) For Dimension M, please check the beam width on the specifications.
- 4) Dimension N is applicable when safety latch is opened.
- 5) Contact the factory for wide beam applications

ELEPHANT PUSH & GEARED TYPE TROLLEYS

- Adjustable to fit various beam widths
- A solid carbon steel design
- The wheels of the trolley fit both I-Beams and H-Beams
- Trolley wheels are parkerized for corrosion resistance
- High quality closed bearings provide smooth traversing
- With Anti-Drop plates

The shape of the plain trolley for more than 8 ton is different from above drawing.

*If being paired with a motorized hoist, please consult with Elephant before proceeding. The brackets and connector between the side plates will change, to accommodate stresses generated by motorized hoists.

Patent and Copyright Registered

YA LEVER HOIST

- Rounded lever design for smooth operation when placed against flat surfaces
- Grade 105 galvanized load chain, which adheres to the strict German DIN 5684 standard.
- True one touch free spooling, which automatically brakes when a load is applied.
- Redesigned hooks with tip supporting safety latch
- Hoist body has an electro-deposited black finish for corrosion resistance
- Ratchet recovery of 16.5° for 0.8t-1t and 14° for 1.6t-12t
- Internal side plates have hardened steel bushings for excellent load sheave & pinion support
- Internal side plates, pinion, pawls, and pawl springs have an electro-deposited coating that helps resist corrosion
- Internal disc hub and ratchet wheel are nickel plated for corrosion resistance
- Suitable for operation within a -4° ~ 140° F temperature range

“MINI” LEVER HOIST

- Grade 105 galvanized load chain, which adheres to the strict German DIN 5684 standard.
- Hoist body has an electro-deposited black finish for corrosion resistance.
- The YA-50 has a unique hook design with tip supporting safety latches
- Both models have a compact design, for use in tight spaces
- Easy to store within a tool bag or tool chest
- Select internal components are nickel coated to help prevent corrosion
- YIII-50 model has an overload protection safety device

SHIPYARD / UPSET WELDING HOOKS

- **Available in YA & YIII Series**
- **Capacities : 0.8t, 1t, 1.6t, and 3.2t**
- **High Stiffness on Top and Bottom Hooks**
The hooks have been made stiffer by thoroughly quenching during production. The value of permanent deformation of the breaking load point is now 10% higher than our original hooks.
- **Equipped with Overload Protection (YIIIS Series)**
The overload protection device of the YIIIS and the durable point load hooks help to prevent damage to the hoist, as well as injury to personnel.
- **Reducing Maintenance Cost (YIIIS Series)**
The Overload Protection Device of the YIIIS and the durable point load hooks help to prevent damages that a normal hoist without overload protection would endure, thus reducing annual repair cost.
- **Three Protrusions on the Hooks**
The shipyard hook has protrusions on each side of the hook to help prevent a load from slipping off. The protrusions also help to measure the distance of the hook's opening.
- **Uses:**
Shipyards, Fabrication Facilities, Upset Welding, Pulling Angle Iron, and other Industrial Applications

LATCH LOCK HOOKS, POSITIVE LOCKING

- The Latch Lock Hook's design helps to better ensure that your load is secure
- Premium Japanese quality, forged & heat treated
- The special design of the hook and latch offers better longevity in the field
- Simple operation

ELECTRIC CHAIN HOIST SA TYPE 1 PHASE, 1 SPEED

Optional Overload Limit Device for the SA Hoists

Our new Torcon overload protection device is a slip clutch style. In the event of an overload, the device actuates and prevents the hoist from continuing to lift. This mechanism protects the hoist from damage.

- Single phase class B insulation with a short time duty of 25 minutes.
- Thermal protector - senses abnormal rise in temperatures within the motor and automatically shuts the motor down to prevent damage.

Optional Motorized Trolleys

- MTS series motorized trolley, single phase, for combination with the SA electric chain hoists. 1/4t ~ 1 ton only.
- Trolleys come with pivoting adapter for hook to hook type suspension or lug type suspension

Wiring - Simple Plug-In Type Connection

FEATURES OF SA/SAM

1 Tough, Heavy-Duty Motor

Elephant's unique design for a lower power consumption.

	Insulation class	Short time duty
SA	B	25 minutes

2 Reliable Electro-Magnetic DC Brake

3 Highly durable load chain manufactured in Japan by Elephant

4 Totally Enclosed Steel Plate Construction

5 Durable top and bottom hooks

Bottom hook with bearing smoothly swivels, 360°. In the event of an overload, the hook gradually elongates. This elongation serves as an indicator to the end user, making them aware of the overload.

6 Chain Bucket Hard plastic

7 Limit switch Standard feature

8 Ambient temperature range 14°~104° F

9 Ratings JIS/ISO M4, FEM 1AM, ASME H3 Motor, IP54 Hoist Protection, IP65 NEMA 4X Pendant Protection

Note: This model is not designed for excessive inching or jogging

ELECTRIC CHAIN HOIST FA TYPE 1 SPEED, 3 PHASE DUAL VOLTAGE & FB TYPE 2 SPEED, 3 PHASE SINGLE VOLTAGE

Optional Overload Limit Device for the FA and FB Hoists

Our new Torcon overload protection device is a slip clutch style. In the event of an overload, the device actuates and prevents the hoist from continuing to lift. This mechanism protects the hoist from damage.

- MAS series motorized trolley, three phase, single speed, slower traversing speed, for combination with the FA series electric chain hoists
- MAF series motorized trolley, three phase, single speed, faster traversing speed, for combination with the FA series electric chain hoists
- MB series motorized trolley, three phase, dual speed, for combination with the FA series electric chain hoists
- Trolleys come with pivoting adapter for hook to hook type suspension or lug type suspension

Wiring – Simple Plug-In Type Connection

FEATURES OF FA/FB

1 Tough, Heavy-Duty Motor

Elephant's unique design for a lower power consumption.

	Insulation class	Short time duty
FA	E	30 minutes
FB	E	30 minutes (high speed)
		15 minutes (low speed)

- 2 Reliable Electro-Magnetic DC Brake** The brake safety factor is more than 3 times of the rated load. A safe electromagnetic, power off brake type. The safe 'power off brake' holds a load when electric power is either accidentally lost, or intentionally disconnected.

- 3 Highly durable load chain manufactured in Japan by Elephant**

- 4 Totally Enclosed Steel Plate Construction**

- 5 Durable top and bottom hooks**

Bottom hook with bearing smoothly swivels, 360°. In the event of an overload, the hook gradually elongates. This elongation serves as an indicator to the end user, making them aware of the overload.

- 6 Chain Bucket** Hard plastic

- 7 Limit switch** Standard feature

- 8 Ratings** JIS/ISO M4, FEM 1AM, ASME H3 Motor, IP54 Hoist Protection, IP65 NEMA 4X Pendant Protection

**ELECTRIC CHAIN
HOIST DA TYPE
1 SPEED, 3 PHASE
SINGLE VOLTAGE
&
DB TYPE 2 SPEED,
3 PHASE SINGLE
VOLTAGE**

Features of the DA/DB Electric Chain Hoist

① An efficient motor that offers high lift speeds

The DA/DB series hoist features a newly developed motor for severe conditions, which allows it to operate continuously for long periods of time with frequent starts within an hour cycle. These lifting speeds were engineered to be as fast as possible to ensure efficiency.

② Quiet operation with a sealed protective body against dust

Durable helical gears & an oil bath style gear case make these units quiet during operation.

③ Solid steel side plates for a rugged heavy duty construction

④ Highly durable load chain

Our surface hardened load chain is manufactured within our factory in Osaka, Japan and is in compliance with ISO standard grade T, offering a satisfactory degree of breaking strength, wear resistance, and impact absorption. We can also offer load chain of a higher corrosion resistance upon request.

⑤ Safe DOUBLE BRAKE design

A mechanical brake and motor brake – the electric-magnetic brake is combined with a mechanical brake to constitute a complete double brake system. Even the former alone has enough capacity to hold a static safe working load!

⑥ DC brake and motor with low power consumption

A DC solenoid is used for the electro-magnetic brake. This lowers the electrical consumption throughout the operation of the electric chain hoist.

⑦ A safer chain guide with our unique design

The DA/DB series is designed so that the chain guide's rotation on the load sheave transmits to the electrical limit switch. The electric limit switch automatically stops the operation of the hoist in the event that the load chain is raised or lowered to the chain's end. In this case, the limit switch would also engage if dust or foreign matters remain pressed within the pockets of the load sheave.

⑧ Reliable double-action limit switch

Electrical limit switch for this model acts in two steps. In the first step the limit switch breaks the operating circuit. Then within the second step, the limit switch breaks the main circuit. Ensuring the hoist ceases operation.

⑨ Negative phase contactor and a highly efficient magnetic contact with a mechanical & electrical interlock

⑩ Motor frame

The motor frame is constructed with high quality aluminum cooling fins which help reduce the rise of temperature within the motor

⑪ Durable chain container

⑫ Pendant control switch is set at 24v for safe operation

⑬ Push-push button style pendant for the DB models

⑭ Top and bottom hooks with safety latch

Designed to gradually open and not break suddenly in the event of an overload. A compact thrust bearing also helps to prevent the load chain from twisting.

⑮ Ratings

JIS / ISO M5, FEM 2M, ASME H3 Motor, IP54 Hoist Protection, IP65 NEMA 4X Pendant Protection

- For understanding the descriptions at the upper row of the Table:

- As for the rails belonging to the blue indicated zone, the standard type trolleys can be fitted to each of them.
- As for the rails belonging to the gray-indicated zone, such trolleys as having special dimensions to meet them must be prepared separately.

- For understanding the descriptions at the medium row of the Table:

Each of the figures indicated at this row shows the distance [a](unit:mm) of the sketch at right side.

This distance [a] may be zero or negative depending on the combination of the standard trolley with some types of rails: for this case, no figure is given here because such combination can't be put in actual application.

In the case of the combination indicated with a blue figure, the trolley's top is higher than the rail's top so that the trolley may touch the ceiling suspending the rail ($H \leq K$): pay attention to this.

- For understanding the descriptions at the lower row of the Table:

Each of the figures indicated at this row shows the distance [b](unit:mm) of the sketch at the right side. The distance [b] may be zero or negative depending on the combination of the standard trolley with some type of rails: for this case, no figure is given here because such combination can't be put in actual application. Also for the rails whose thickness t_2 is too thin to hold the rated load, no figure is given.

If there is even one blank at either of the upper, medium and lower rows of the Table, this means that such relevant rail can't be used to together with the trolleys.

In this way, referring to the Table, you will see what type of rail(I beam) is suited to the trolley you have selected.

Then it is needed to check if such rail satisfies the following condition: even if it is given a 125% of the rated safety load, its deflection amount shall be 1/1200 of its support span or less. That is, the I beam to be selected shall have its moment of inertia of the longitudinal section (Ix) be as follows:

I_x : Moment of inertia of the longitudinal section $\geq 119.1 \times W \times L^2$

In which,

W: W.L.L.×1.25+Chain block's own weight(ton)

L: Support span(m)

For "Combination of Electric Trolleys with Traversing Rails", the following must be taken note of:

At the medium row of the table:

In the case of the combination indicated with a gray zone, the relation $H \leq K$ applies to both plain trolley and geared trolley.

In the case of the combination indicated with a blue zone, the relation $H \leq K$ applies only to the geared trolley.

NOTES ON THE WIRING DIAGRAM

1. Our electric chain blocks(with the trolleys included), either DA type or DB type, are usually designed to operate on the 3-phase power source.

The electrical parts used for our chain blocks are all the precision ones which can normally operate even with an accidental voltage drop (with a 10% reduction of the rated voltage)

2. As standard, our lifting motor (LM) and trolley motor (TM) are respectively assured of the following ratings.

	Kind of Insulation	Short time duty	Intermittent duty
LM	E	30 minutes	40% ED, Number of starts : 240/h
TM	E	15 minutes	25% ED, Number of starts : 240/h

In the case of the DB type, however, its rating will be like:

Short time duty		Intermittent duty	
High speed	Low speed	High speed	Low speed
30 minutes	15 minutes	40% ED, Number of starts : 240/h	20% ED, Number of starts : 120/h

3. As to the 4-core power cord, or the 7-core cabtyre cord used for the DAGC, DBGC, DAPC or DBPC type, they are each usually of 5m in length. The cords of other length than the above, or of special dimensions, are available upon request.

4. When connecting the power cord to the power source, take care of its correct phase so that the lifting motor can rotate in UP direction and DN direction according to the push of the UP button and DN button on the control switch. If the connection phase is reversed, the negative phase protector starts to work to prevent the lifting motor from rotating in either direction. If this occurs, exchange the connection phase of the black and red leads from each other: at the time, avoid changing the wire connections in the control switch, chain block and trolley.

5. The running direction of the electric trolley and/or the saddle has been decided at the shipment, and it may be changed, at your site, by changing the wire connection at the control switch case.

HOIST CLASSIFICATION

	JIS/ISO classification	FEM classification	ASME classification	International protection
DA	M5	2m	H3	IP54
DB	M5	2m	H3	IP54

DEFINITION OF WORDS

Lift and Length of Pushbutton Switch Cord

As the electric chain block is operated, its bottom hook moves up and down and the longest distance of this motion is called a "lift". In other words, the lift refers to the distance between the bottom hook's highest position (with the upper limit switch actuated) and its lowest position (with the lower limit switch actuated).

The length of the pushbutton switch cord refers to the distance between the bottom of dimension L and the lower surface of the pushbutton switch case.

Traversing, Traveling with Trolley and Saddle.

The electric chain block, while hoisting any of loads, may be moved in lateral or longitudinal direction when used in combination with a trolley or saddles which is fitted on a rail. Usually, the trolley is used for a lateral motion of the electric chain block and saddles for a longitudinal motion of it.

And when the chain block moves laterally, we call it as "traversing" and when it moves longitudinally, we call it "traveling".

Depending on your job requirements, the ELEPHANT electric chain blocks may be combined with different types of saddles of our own; refer to our catalog "ELEPHANT Electric Saddles".

Short Time Duty Rating and Intermittent Duty Rating

As a criterion to indicate the strength and durability of our electric chain blocks. We have specified the ratings of the short time duty and intermittent duty concerning their included electric motors—see the page 12 of catalogs.

• Short Time Duty Rating

"Short time duty rating" means the limited time that the admissible temperature limit of its electric motor won't be exceeded, when the electric chain block is operated continuously on the below cycle.

• Intermittent Duty Rating

Compared with "short time duty rating", the temperature of motor rises gradually by properly giving rests to the chain block between its operating periods (lifting and lowering). The percentage duty cycle ED is found as follows.

$$\%ED = \frac{\text{Operating periods}(t_1+t_3)}{\text{Operating} + \text{Rest periods}(T)} \times 100$$

based on the maximum cycle period of 10 minutes. The number of starts/h also affects the rise of temperature. Thus these two factors are specified to show the intermittent duty rating of the electric chain block under the specification of which the electric motor can be operated safely without exceeding its admissible temperature limit.

* The specification and dimensions may be changed without prior notice for improvement.

HOOK DIMENSIONS

• BOTTOM HOOK WEIGHT

• LOAD CHAIN WEIGHT

Max working load (mt) & number of falls		0.25	0.49	0.5	1S	1W	1.5	2S	2W	2.5	2S	2W	7.5	10
DIMENSION (in)	A	2.9	3.3		4.05		5.3	5.3	5.3	6.49	7.2	9.0	9.0

	C	1.0	1.0		1.18		1.45	1.45	1.45	1.88	2.28	2.8	2.8	
	D	1.3	1.69		1.96		2.55	2.55	2.55	2.36	2.75	3.3	3.3	
	E	.7	.7		.98		1.37	1.37	1.37	1.9	2.08	2.48	2.48	
Bottom hook weight (lbs)		1.5	1.7		3.7	8	7.7	7.7	12	7.7	25	39	143	176
No. of fall load chain		1	1		1	2	1	1	2	1	2	2	3	4
Load chain weight (lbs)	Per 3.2'					1.89			2.4		4.3	5.86	5.86	5.86
	Per 3.2' lift	1.4	1.89		2.4	3.79	4.3	5.8	4.85	5.86	8.6	11.75	17.6	23.5

Hooks are produced through a hot forging process and so the dimensions may have some errors : $\pm 2\%$ for 0.25 ~5t hook and $\pm 3\%$ for the 7.5 and/or 10t hook.

Reading of Model/Code

DA-0.25
DBP-3
DAG-2 S
DAMC-1 W

Typical Examples

To show the number of falls
To show the rated load capacity(ton)
To show the class of each model

Class code:

- It identifies the type (single speed or dual speed type), the number of buttons on the control switches and kinds of trolleys (electric, geared or plain). See the sketches at right.

Rated load capacity:

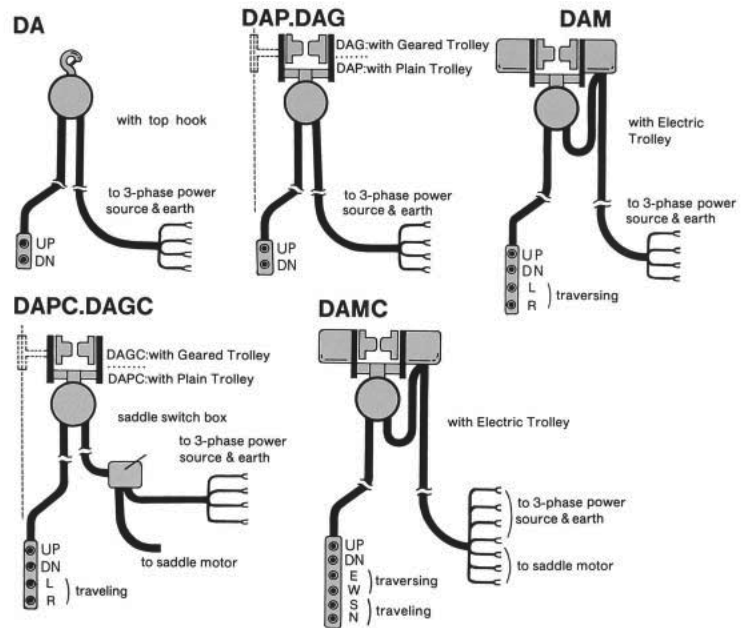

- It shows the rated load capacity(ton) of the relevant chain block.

Number of falls:

- It identifies whether the relevant chain block is the 1-fall type or the 2-fall type block(S=1, W=2).

Note: Indication of the number of falls is omitted for certain model in the case where it has been specified according to its rated load capacity.

Class Code

- Usually the pushbuttons located on the control switch are labeled as "UP", "DN", "L", "R", "E", "W", "S" and "N". The other types of labeling are available upon request.
- In the case of the dual speed type (DB type), the chain block can be wound UP and DOWN at either high speed or low speed. The UP and Down buttons are each of push-push type: at the first push, it provides low speed operation and at the second push, it provides high speed operation.

* The specification and dimensions may be changed without prior notice for improvement.

ALPHA SERIES COMPACT ELECTRIC CHAIN HOIST 1-PHASE

Features of the ALPHA Compact Electric Chain Hoist

- ❶ The aluminum die cast body is designed for environments where noise levels must be kept to a minimum
- ❷ Compact design with low headroom, net weight of the hoists range from 32 lbs. with a standard 10' lift
- ❸ Alpha S series has a single brake design
- ❹ Overload and overwind safety device. This device ensures stability when the hoist is over wound, or over lowered. The device also protects against an overload of the unit, helping to prevent damage to the hoist and injury to personnel.
- ❺ A special surface treated load chain for corrosion resistance
- ❻ The load chain is extremely durable, adhering to the strict German DIN 5684 standard
- ❼ Upper and lower hooks with safety latches are designed to slowly stretch in the event of an over load, allowing for a visual indicator to the operator, to cease operation. The bottom hook has a thrust bearing to reduce stress on the lower block, while under load.
- ❽ The pendant control's contactor is designed for frequent use, guaranteeing excellent durability, even when 'inching' a load.
- ❾ Rating JIS/ISO M4, FEM 1AM, ASME H3 Motor, IP54 Hoist Protection, IP65 NEMA 4X Pendant Protection

- Notes:**
1. The minimum distance between hooks slightly differs according to the size of the applicable traverse trail.
 2. The single-phase traverse motor has E-class insulation, and the short time rating is 15 min.
 3. The power cord of 0.5m extending from the trolley (3-core; 1 pc. for earth) is supplied.

 3. 500kg type is also available to supply the equipment for the 490kg.

BETA COMPACT ELECTRIC CHAIN HOIST

- 125kg & 200kg
- 1 Phase 115V
- Unit weight with standard lift is 10 lbs
- 11" headroom
- Ideal for carrying in tool boxes
- Overload protection device
- Overwind protection
- Plastic chain container
- Ratings JIS / ISO 1AM, FEM M4, ASME H3, Hoist protection is IP54, Pendant is IP65 NEMA 4X

- Motorized trolleys available for the ATSI & Rigger Series
- For hoist capacities greater than 20 ton, see the Monorail Style Units
- Air motor has a polished stainless steel cylinder
- Anti-tip and anti-drop devices
- Manufactured with high quality steel components, allowing for a compact design
- Available with spark resistant features
- Available with marine paint finish

ROPE CONTROL

Pull cord control allows for infinitely variable speed for lifting and lowering applications.

PENDANT CONTROL

Pendant controls are machined from solid brass for corrosion resistance. The control's emergency stop button is a standard feature. This style pendant control is also available in aluminum.

REMOTE CONTROL PANEL

With lift synchronization that allows for operation of any one hoist, or a combination of multiple units simultaneously

WIRELESS CONTROL PENDANT

Offered for standard environments, as well as spark resistant applications.

Standard Model ATS Air Chain Hoists are Acceptable for Division 1 & 2 Applications, as follows:

- Division 1 (Spark-Resistant air hoists are required)
Atmospheres containing hazardous concentrations of flammable gases, dusts, or fibers, continuously, frequently or periodically, under normal operating conditions.
- Division 2 (Standard air hoists are required)
Atmospheres, normally non-hazardous, in which a hazardous concentration of flammable gases, dusts, or fibers, occurs when a container or handling system fails, or the ventilating system which normally keeps the concentration non-hazardous, fails

Classification of hazardous places

Gases, Vapours

Zone 0

place in which an explosive atmosphere consisting of a mixture with air of flammable substances in the form of gas, vapour or mist is present continuously or for long periods or frequently

Zone 1

place in which an explosive atmosphere consisting of a mixture with air of flammable substances in the form of gas, vapour or mist is likely to occur in normal operation occasionally

Zone 2

place in which an explosive atmosphere consisting of a mixture with air of flammable substances in the form of gas, vapour or mist is not likely to occur in normal operation but, if it does occur, will persist for a short period only

Dusts

Zone 20

place in which an explosive atmosphere in the form of a cloud of combustible dust in air is present continuously, or for long periods or frequently

Zone 21

area in which an explosive atmosphere in the form of a cloud of combustible dust in air is likely to occur, occasionally in normal operation

Zone 22

area in which an explosive atmosphere in the form of a cloud of combustible dust in air is not likely to occur in normal operation but, if it does occur, will persist for a short period only

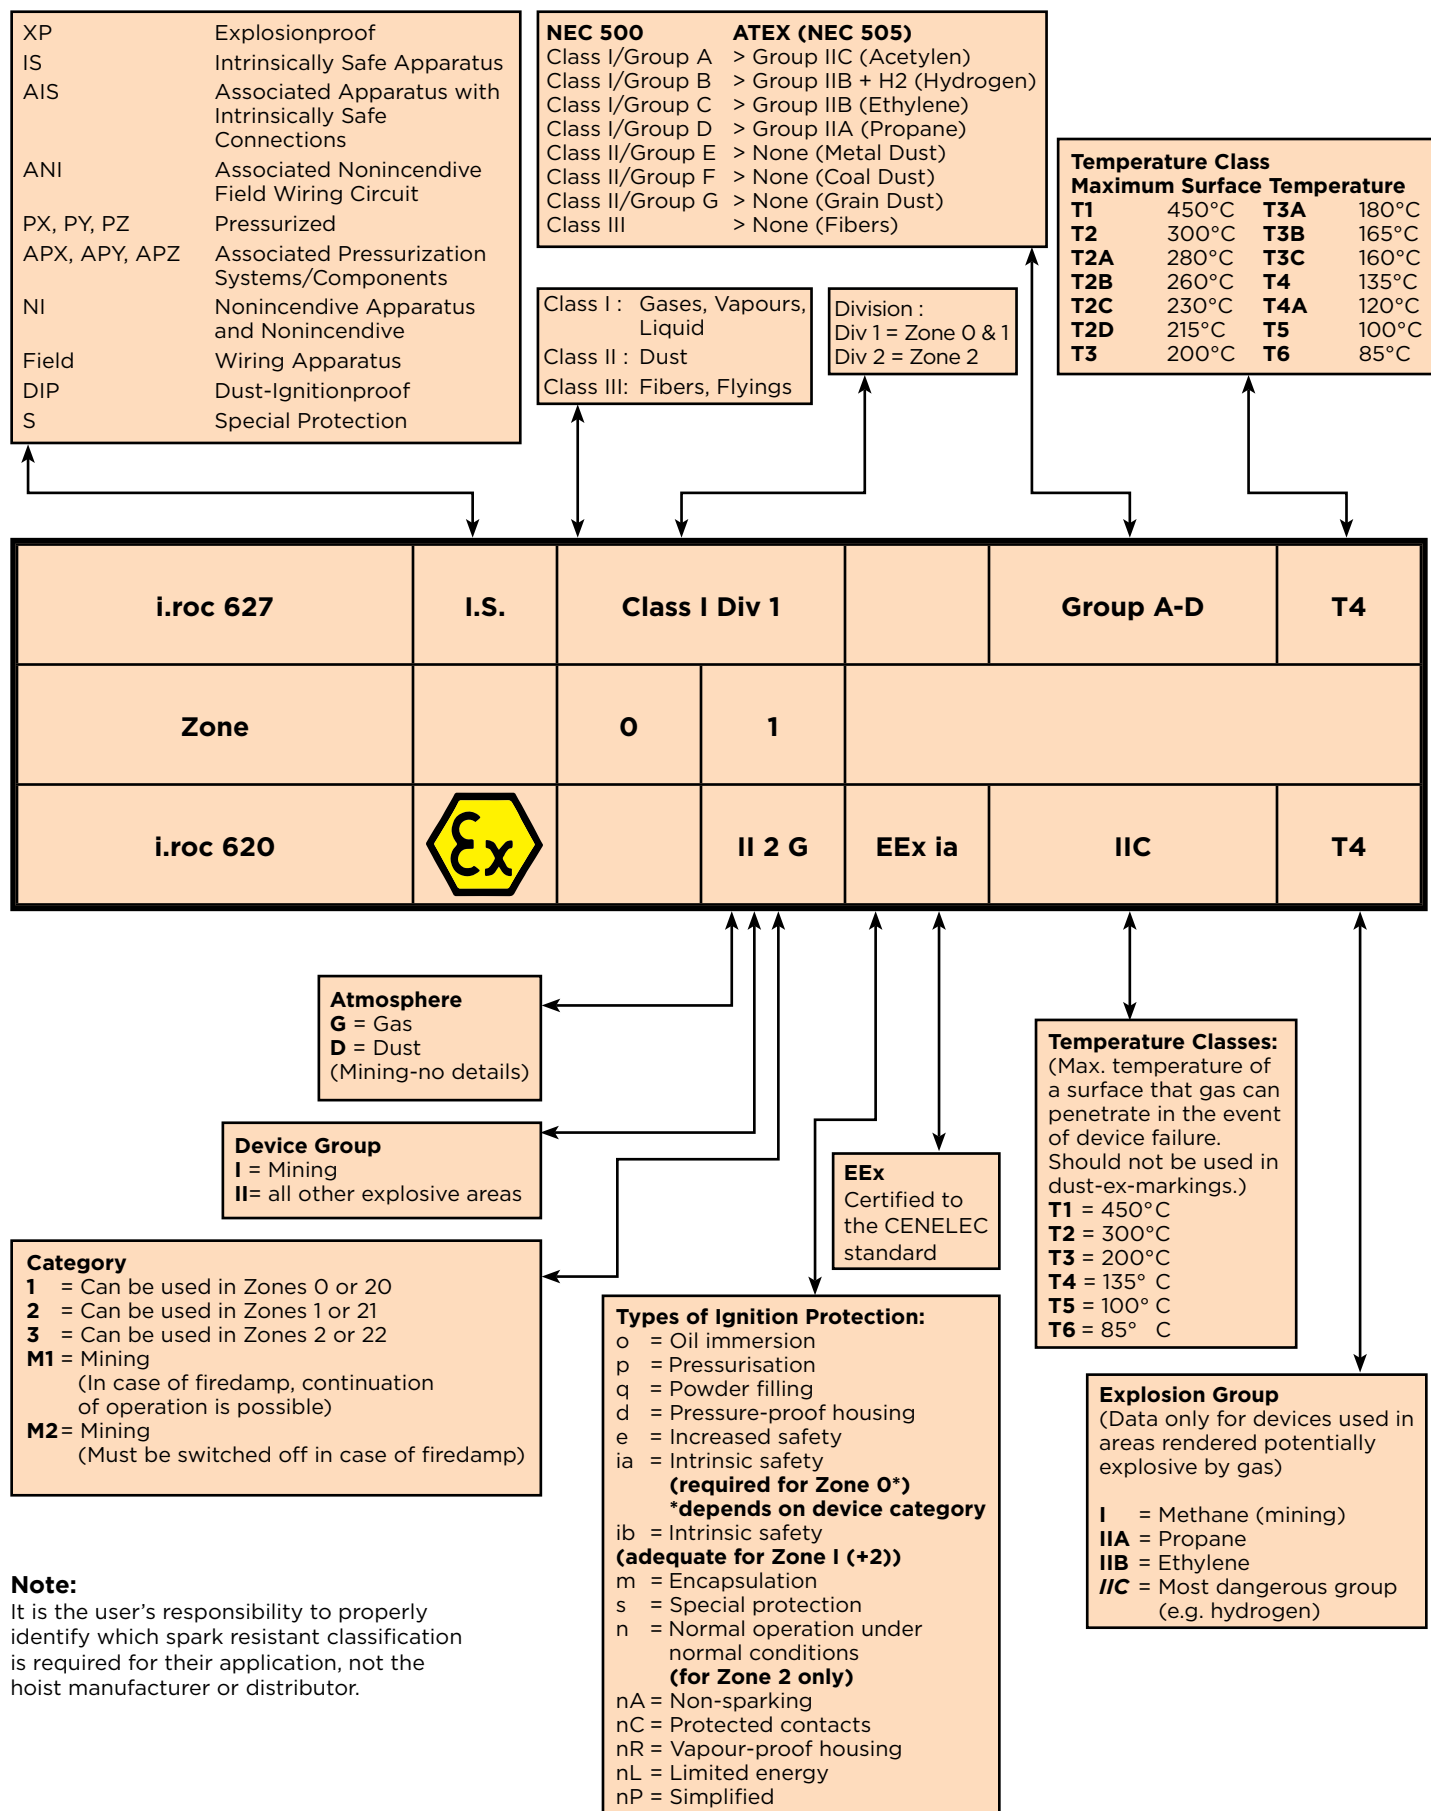

The above rendition is for reference only

Hazardous area				
Conditions and subdivisions			Required marking on the usable equipment	
Flammable materials	Temporary behaviour of explosive atmosphere	Classification of hazardous areas	Equipment Group as defined in directive 94/9/EC	Equipment category as defined in directive 94/9/EC
gases vapours	is present continuously or for long periods or frequently	zone 0	II	1G
	arises in normal operation occasionally	zone 1	II	2G or 1G
	is not likely to arise in normal operation, or if it does, will persist for a short time only	zone 2	II	3G or 2G or 1G
dusts	is present in the form of a cloud continuously, or for long periods or frequently	zone 20	II	1D
	occasionally develops into a cloud during normal operation	zone 21	II	2D or 1D
	is not likely to develop into a cloud during normal operation, or if it does, for a short time only	zone 22	II	3D or 2D or 1D
methane carbon dust	eration where there is a risk of explosion	-	I	M1
	disconnection where there is a risk of explosion	-	I	M2 or M1

Above codes are applicable to Atex standards

ATEX Flow Chart

Note:

It is the user's responsibility to properly identify which spark resistant classification is required for their application, not the hoist manufacturer or distributor.

Features:

- Lubrication free rotary vane motor – Rust free & replaceable stainless steel cylinder
- 100% Duty cycle
- Robust epicycle gearbox (grease filled and sealed)
- Choice pilot pendant with E-Stop or direct pendant control - Variable speed
- Urethane yielding buffers for upper and lower limit stops
- Aluminium and SG Iron housings
- Internal silencing
- High grade carbon steel swivel hooks with safety catches
- Galvanized Grade 80 Load chain made to EN818-7 standard – 5:1 Design factor of safety
- Automatic self-adjusting multi disc brake 125% WLL
- Tried and tested delta P design load limiting device set 130% WLL*
- Spark resistant (Atex Zone 2)

Options:

- Marine spec - Nickel coated and marine paint
- Corrosion resistance: stainless steel hooks and chain, special paints
- Chain containers
- Plain, geared and motorized trolleys

ATS MONORAIL HOISTS

10ton - 60ton

Standard Features:

- Standard Hoists are Atex approved, EX II 2 GD IIC T4 (X) / EX II 2 GD IIB T4 (X) / EX II 2 GD IIC T4 (X)
- Copper platings and stainless steel components can be offered for increased spark resistance
- Lubrication free rotary vane motor. - Rust free & replaceable Stainless steel cylinder
- 100% Duty cycle
- Ideal for working in hazardous areas (Explosive environments)
- Temperature Rated -4°F to 158°F
- Insensitive to dust and humidity
- High Grade carbon steel swivel hooks with safety latches
- Galvanized Grade 80 Load chain made to EN818 standard - 5:1 Design factor of safety
- Automatic self-adjusting multi disc brake 125% WLL.
- Tried and tested slip clutch design load limiting device set 130% WLL.
- Compact design and Lowest headroom in class.
- Anti-climb and Anti-drop devices standard.
- Pilot Pendant control with Emergency shut-off valve
- Complaint with ASME B30.16

ATS Monorail hoists are designed for the offshore industry, or wherever heavy loads have to be moved in confined spaces. Depending on the application these hoists can be used in pairs or even sets of four units. For example: Working in parallel units handling BOP handling systems from 20 ton to 150 tons. Or working in unison and connected by a tie bar for handling heat exchangers.

Options:

- Rack and pinion drive
- Marine Spec - Nickel coated and marine paint
- Corrosion resistance: special paints
- Chain containers
- Integrated Wireless Load cells
- Remote control panel - with lift synchronization
- Third Party Acceptance available on request

Special Application:

- If you have a unique application and require a non-standard system, a unit can be designed to your requirements

DIMENSIONS - ATS MONORAIL HOISTS - 10ton - 60ton

ATS LOW PROFILE 0.25ton - 6ton

Ideal for areas where headroom is restricted and standard trolleys are not able meet the lifting height requirements, the ATS UL Series Low Headroom Trolleys are recommended.

**Standard Features:**

- Standard Hoists are Atex approved, EX II 2 GD IIC T4 (X) / EX II 2 GD IIB T4 (X) / EX II 2 GD IIC T4 (X)
- Copper platings and stainless steel components can be offered for increased spark resistance
- Lubrication free rotary vane motor. – Rust free & replaceable Stainless steel cylinder
- 100% Duty cycle
- Ideal for working in hazardous areas (Explosive environments)
- Temperature Rated -4°F to 158°F
- Insensitive to dust and humidity
- High Grade carbon steel swivel hooks with safety catches.
- Galvanized Grade 80 Load chain made to EN818 standard – 5:1 Design factor of safety
- Automatic self-adjusting multi disc brake 125% WLL.
- Tried and tested slip clutch design load limiting device set 130% WLL.
- Compact design and Lowest headroom in class.
- Anti-climb and Anti-drop devices standard.
- Pilot Pendant control with Emergency shut-off valve
- Compliant with ASME B30-11 and B30-16

Options:

- Marine Spec - Nickel coated and marine paint
- Corrosion resistance: special paints
- Chain containers

BOP HANDLING MATRIX

20t, 30t, 40t, 50t,
60t, 75t, 100t, 150t,
180t, 200t, & 240t

Application: Designed for handling Blow Out Preventers on land and offshore drilling rigs. ATS Pneumatic's BOP systems have been engineered to meet or exceed current regulations set forth for the oilwell drilling industry.

- Standard Hoists are Atex approved, EX II 2 GD IIC T4 (X) / EX II 2 GD IIB T4 (X) / EX II 2 GD IIC T4 (X)
- Copper platings and stainless steel components can be offered for increased spark resistance
- Please see monorail hoist information on pages 68 and 69 of this catalog
- Can be used in pairs, or even sets of four
- Can be controlled via a synchronized control console that allows for operation of any one hoist, or combination of multiple units simultaneously
- Can be offered with integral wireless load cells
- ABS and DNV load test witness can be arranged
- Bottom blocks have water drain ports, allowing corrosive sea water to drain from the block
- The sheave for the load chain has an exterior access point for lubrication
- Filter lubricator station mounted on unit
- Corrosion resistant marine packages are available with special platings and paint finishes
- Galvanized steel and stainless steel chain containers are available

ATS PNEUMATIC WINCHES

Jr1.5t ~ Sr2.4t

ATS Air Winches are designed for Lifting and pulling applications in difficult applications like Marine, Offshore industry, Mining or wherever heavy loads have to be moved in confined spaces.

Standard Features:

- Lubrication free rotary vane motor – rust free & replaceable stainless steel cylinder.
- 100% duty cycle.
- Ideal for working in hazardous areas (explosive environments).
- Temperature rated -20°C to 70°C.
- Insensitive to dust and humidity.
- Designed to conform with ASME 30.7 and FEM Classification 1Bm.
- Designed with a 5:1 factor of safety for lifting.
- Automatic self-adjusting multi disc brake 125% WLL
- Tried and tested Delta P load limiting device set 130% WLL for all CE model (lifting only).
- Spark resistant (Atex Zone 1 & 2).
- Compact design and lowest weight in class.
- Pilot pendant control with emergency shut-off valve or Variable speed toggle control.
- **OPTIONAL** Declutchable drum for free spooling.
- Individually load tested before shipment – Delivered with Load Test Certificate.

CORROSION RESISTANT +V CLASS “WHITE” LOAD CHAIN

Made in Japan by Elephant Chain Block

A specialized manufacturer of the world's highest grade chain. Our chain adheres to the German DIN 5684. +V (plus V) class high tensile strength (105kgf/mm²) load chain, surpassing ISO grade V standards. See characteristics of the chain below.

CHARACTERISTICS - ELEPHANT GRADE +V (PLUS V) LOAD CHAIN

Mechanical Properties	ISO 16872:2008 Grade VH, fine tolerance chain	ELEPHANT +V (plus V) load chain
Minimum breaking stress (kgf/m m2)	100	105
Total ultimate elongation (%)	Min 17.0	Min. 22.0
Temperature limit for ordinary use (F°)	32°	Min. -40° Max. +302°

GRIPPA PUSH & GEARED TROLLEYS

0.5-5t Trolleys

- Solid carbon steel design
- Adjustable to fit various beam widths with traditional spacers
- Wheels of the units fit both I-beams and H-beams
- Trolley wheels are coated for corrosion resistance
- With anti-drop plates
- 100% stainless steel spark resistant & corrosion resistant units
- Lug mount adaptors are available, for hoist to trolley combination

10-40t Trolleys

Note: 40t trolley is a tandem design, request drawing from factory

UNIVERSAL GRIPPA CLAMP

- Designed for vertical & side load applications at full rated capacity
- Developed for lifting, pulling, and as an anchor point
- The raised eye design allows for a full 90° side pull from both sides
- Low headroom concept
- Can be rated for personnel tie-off, upon request
- 4:1 safety factor
- Individually Load tested to 2x the rated load

SPECIFICATIONS & DIMENSIONS - UNIVERSAL GRIPPA CLAMP

MODEL	S.W.L. (t)	S.W.L. (Ton)	A	Ø B	C	D	E	F	G	H	I	J	K	WEIGHT (lbs)
UGC-2	2	2.2	14.2	2.0	2.0	2.0	1.3	8.2	3.6	1.0	0.9	0.6	4.9 to 8.0	22
UGC-3	3	3.3	15.4	2.7	2.0	2.0	1.3	9.0	3.9	1.0	1.1	0.8	4.9 to 8.0	31
UGC-5	5	5.5	20.7	3.0	2.0	2.0	1.3	10.6	4.7	1.0	1.5	1.0	4.9 to 12.00	62
UGC-10	10	11	20.7	3.0	2.0	4.0	1.3	10.7	4.7	1.0	1.5	2.0	4.9 to 12.00	93
UGC-20	20	22	27.6	4.7	3.7	*	1.6	*	*	1.8	*	1.6	4.9 to 20.5	145

If the end user is solely using the clamp for hanging vertical loads under a beam, then a standard girder clamp is recommended. Reasoning is that in the event of a shock load, the UGC could slide into the radius of the web, potentially causing damage to the clamp heads and the beam.

GRIPPA ADJUSTABLE RAIL LIFTING CLAMPS

- 3 ton capacity
- Heavy duty clamp, originally designed for the harsh mining environments of South Africa
- Robust steel construction
- Suitable for most rail sizes
- This clamp should be used in pairs

Conforms to CSIR tests: Endurance Test 60,000 Cycles at 1.5 x SWL and Factor of Safety Min 4 x SWL

EYE BEAM CLAMP

This I-beam clamp can be used as an anchor for various applications and for any type of construction. The 'eye' shackle design assists the user in rigging, and the zinc plated clamp screw assembly allows for easy adjustment of the clamp. This clamp features metric capacities that range from 1, 2, 3, 5, and 10 tons.

* Load ratings are based upon 0 to 15° vertical lift.

* Consult a certified rigger when in doubt, for rigging and placement of the clamps

JUMBO BEAM CLAMP

The Jumbo Beam Clamp is a great option for rigging applications. This clamp line features a wide jaw opening for wide flange beams used throughout industry. The JBC's clamp screw assembly is also zinc plated. This clamp series features metric capacities that range from 3, 5, 6, 10 and 16 tons.

* Warning: Clamps must be installed properly and fully tightened

* Always contact the manufacturer when in doubt

WF SCREW TYPE CLAMP

OMNIDIRECTIONAL DOUBLE CAM

LOCK SCREW TYPE CLAMP

- One of the world's lightest screw clamps: Main body, cam and screw are made of a special alloy steel which is manufactured using our original heat treatment process. They are compact and superior in strength.
- The round double cam lock design allows for a stronger clamping capacity and safe operation. The turning of the round double cams engages the clamp load. Both cams contact the internal spherical surface assuring safe operation, free from slipping.
- Two lifting holes allow for omnidirectional, vertical and horizontal lifts.
- The clamp can be used to hoist inclined loads such as I-beams. **Do not place on a beam taper that exceeds 10°.**
- The fine screw threading creates a vibration resistant clamp.
- Round cam and screw are corrosion resistant with the main body of the clamp having a baked finish.
- Lifting & Transporting: General steel products such as H beams, I beams, steel plate, channel and angle iron. Various structures also include steel braces and pillars.
- Suspension: Clamps can be used for suspending manual chain hoists, electric chain hoists, etc...
- Dragging: The clamps can be used for pulling bottom steel board and other objects along the ground.

VA & HAR PLATE CLAMPS

- Heavy duty industrial design, Made in JAPAN
- Elephant's clamp mechanism will visually inform the end user of potential danger caused by wear or previous overload upon the user's inspection, before use
- The lifting eye has vertical and horizontal hole punches which allow the end user to check for overload. For example, if the lifting eye appears oblong on a 1t clamp and the difference of distance between two vertical holes or two horizontal holes are more than 0.08" (2mm), then the overload was about 6 tons
- Overload will first appear as a visual indicator on the lifting eye, when it oblongs. After the eye, deformation will appear in the link assembly, and then the lifting eye pin.
- The tread on the clamp's cam will wear with time, allowing a visual inspection. As the teeth wear down, the user visually notes to make repair
- The clamps have yellow indicators painted on the side plates, which allow the user to check whether or not the load is properly placed within the clamp before use (going past or above the yellow line, verses going above or next to the yellow line). See the user manual for more detailed information.

LOAD TEST STANDS

- Hand operated hydraulic pump eliminates the need for electrical power.
- Designed for testing of hoisting equipment as required by ASME B30.16
- Capable of static testing and dynamic testing.
- Tests the function of load limiting and overload devices.
- Rugged, reinforced steel frame construction for strength and durability.
- High quality hydraulic cylinder made for long life and durability.
- Two stage, quick acting hand pump for speed and ease of operation.
- Fine adjustment pressure valve for accurate load testing.
- Large pressure gauge for easy reading.
- Software template for technical printout of test results.
- Hydraulic pump located on the side for safe operation.

Technical Data: Model ETS-7.5

- Mobil Test Stand, with base mounted wheels and "fork slots" for easy movement
- Overall Dim.: 27"Wx25"Lx61"H
- Hydraulic Cylinder Type:
Single acting, spring return
- Maximum pulling force: 7.5 tons (15,000 lbs) @ 6,787 p.s.i.
- Stroke: 2-1/2" inches
- 16" between vertical supports
- 36" height between bearing points
- Hydraulic Hand Pump: 2 speed
- System pressure: 0 – 7,000 psi
- Weight: 228 lbs.

Technical Data: Model ETS-20

- Overall Dim.: 48"Wx40"Lx99"H
- Hydraulic Cylinder: Single acting, spring return
- Maximum pulling force: 20 tons @ 8,466 p.s.i.
- Stroke: 6 inches
- Hydraulic Hand Pump:
 - 35-1/2" between vertical supports 56" height between bearing points
 - 2 speed
 - System pressure: 0 – 10,000 p.s.i.
 - Reservoir: 5.14 pints
 - Valve: Two speed, fine adjustment pressure preset
 - Gauge: Glycerin filled – 4.0" dia.
- Frame: Mounting holes in base for permanent mount
- Weight: 735 lbs.

Technical Data: Model ETS-30

- Overall Dim.: 59"Wx186"Lx50"H
- Hydraulic Cylinder
 - Type: Single acting, spring return
 - Maximum pulling force: 30 tons @ 6,944 p.s.i.
 - Stroke: 6 inches
- Hydraulic Hand Pump:
 - 34-1/4" between vertical supports 140" between bearing points
 - 2 speed
 - System pressure: 0 – 10,000 p.s.i.
 - Reservoir: 5.14 pints
 - Valve: Two speed, fine adjustment pressure preset
 - Gauge: Glycerin filled – 4.0" dia.
- Frame: American Steel
- Weight: 2242 lbs.

WARRANTY

All hoists sold by Elephant Lifting Products, L.L.C. are assembled, inspected, and tested prior to shipment from the factory site.

All manual hoist products, manual trolleys, and beam / girder clamps carry a 1 year warranty. All pneumatic and electric hoist products have a 1 year warranty period. Spare parts will also carry a 1 year warranty period. These products are warranted to be free from defects in workmanship and in materials used in the construction of each unit. The warranty date of these products begins from the date of shipment by any authorized Elephant Lifting Products, L.L.C. distributor.

All of these hoist products must be used within accordance of the manufacturer's recommendations. It is important that these products not be altered, abused, misused, neglected of proper maintenance, or have any unauthorized repairs done to them. If failure occurs, and inspection reveals that the problem is caused by defective materials or workmanship, repairs will be made without charge to the customer. A customer must obtain an RGA number before return. Elephant Lifting Products will then instruct which authorized repair center the unit and / or units should be shipped to. All approved warranty claims on products will be shipped back to the customer, freight prepaid. Warranty does not cover products that are abused, overloaded, neglected of maintenance, used improperly, side loaded, shock loaded, or subjected to harmful environmental conditions.

Elephant Lifting Products, L.L.C. will not be liable for loss, damage, expense, injury to property, injury to people, death, any consequential damages and disclaims any other expressed / implied product warranty, including warranties of merchant ability and fitness for a particular application. A valid proof of purchase must accompany the warranty claim.

WARNING: Unless otherwise specified, these machines are not designed for personnel handling or lifting loads above people. It is the user's responsibility to determine what equipment is suitable for the application, and to comply with regulation. Always read and understand the operations manual, review warnings, and take precaution. It is strongly recommended that you understand suggested maintenance of the product, and have a maintenance plan in place.
